LLamasoft Wins Award

Augment Ventures portfolio company LLamasoft was awarded MVCA's Capital Event of the Year for its investment and partnership with TPG Capital. This was a significant liquidity event for Augment, and great recognition for LLamasoft.

Augment Begins Investing Fund II

Augment recently secured first close on its second fund, and has made three investments.

[Fluid Screen](#) uses electric fields to capture, sort, and identify bacteria. The company has early traction with major Pharma companies, and is nearly release of its first commercial product.

[Iteros](#) is a distributed energy resource management software platform that uses a templated, API approach to connecting anything to anything on the grid. Their code-free software tools automatically builds a renewable energy control system from its design and optimization tools. Iteros has beta customers on the system, has secured contracts for deployment, and continues to build the sales pipeline.

We have also invested in a stealth biosensing platform. [Check out our website](#) to learn a little more, and we'll be sure to let you know when they're ready to go public with what they do.

Our New Website is Live!

With the new fund comes a [new website](#). While the old one conveyed the necessary information, and had served us well, it was time for a refresh! We went to a new platform, and completely redesigned the site. [Check it out](#) and let us know how it looks!
