

Augment Ventures August 2018 Newsletter

Last month, we featured Mercatus's [Global Advanced Energy Research Report](#) Volume 6, and [Enel's](#), Mercatus success story [as a key partner in driving Digital Transformation](#) within Enel.

This Month, we are featuring the beginning of RayVio delivery of the [LARQ](#) Water Bottle - an ultraviolet light disinfecting water bottle that delivers pure water at the touch of a button. <https://www.livelarq.com/>

RayVio begins shipping LARQ water bottle to Kickstarter Backers

RayVio [anticipates shipping](#) all domestic orders by the end of August and continuing on to international orders in September! This marks the beginning of the roll-out of the ground-breaking self-cleaning water bottle.

The [LARQ](#) bottle is a reusable, rechargeable, insulated water bottle that cleans itself and the water you put inside it.

Pure water in 60 seconds

Drink confidently anywhere. At a touch of a button, the 280nm UV-C light neutralizes up to 99.9999%* of harmful, odor-causing germs. (*in Adventure Mode)

Self-cleaning & worry free

Intelligently activates every 2 hours, basking the water and inner surface in purifying UV light. Never worry about that stinky bottle.
