

## Augment Ventures January 2019 Newsletter

---

**Happy New Year!**  
Wishing all our partners and collaborators a great 2019.

Augment is excited to share the news of our most recent investment in [Flume](#). **Intelligent Leak Detection**

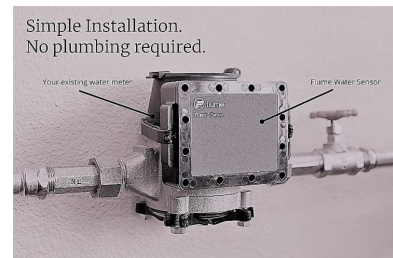

Flume is an IoT device with software and data platform delivering **“Real-Time Water Management & Intelligent Leak Detection”** to residential customers all across the world. Flume is selling its solution directly to consumers and is partnering with water utilities, insurance companies and retailer to expand its reach.

---

***Flume – water damage prevention, water usage insights and water conservation solutions for home owners across the world.***

For more information on **Flume** visit [flumetech.com](http://flumetech.com)

**Other notable headline from our portfolio:**

Mercatus, a leading asset and investment management platform, has become a signatory of the United Nations-supported Principles for Responsible Investment (PRI)
